RESEARCH IN PROGRESS

1. **“The Impact of Body Weight on Wages in the Indonesian Labor Market”**
This study utilises longitudinal data from the Indonesia Family Life Survey (IFLS) and contributes to the literature by re-examining the wage premium in Indonesia through the directed acyclic graph (DAG) framework to address potential unobserved differences in productivity and avoid overcontrol bias. This study also includes interactions between BMI and structural conditions to disentangle statistical discrimination from taste-based discrimination. The results from fixed effects approach indicate that weight premiums exist for men, predominantly due to (positive) statistical discrimination. Conversely, no evidence is found regarding the influence of body weight on women’s wages.
2. **“The Effects of Time-use Agency on Unpaid Work”** with Amy Damon, Diahhadi Setyonaluri, Usha Adelina Riyanto, and Bimbika Sijapati Basnett

OTHER RESEARCH & CONSULTING EXPERIENCE

7. **“LFS Modular Time Use Pilot Project”** 2023
Quantitative Researcher—Commissioned by the ILO
The project assesses the feasibility of regular production of statistics on unpaid domestic and care work via the intermittent integration of a simplified time-use module in national Labour Force Surveys (LFS), focused on India, Lesotho, and Indonesia.
6. **“Impact Evaluation of Indonesian Ministry of Communication and Information Technology’s Programs”** 2022
Quantitative Researcher—Commissioned by Kominfo
The study aims to identify the economic impact of the two programs (constructing base transceiver stations in the least-developed areas and providing 4G cellular in non-least-developed areas in Indonesia) through the average night light intensity index as a proxy of a region’s economic activity.
5. **“The Impact Analysis of Pipes and Fittings Industry on Economy: Case Study of Wavin Indonesia”** 2022
Quantitative Researcher—Commissioned by Wavin Indonesia
The project aims to assess the quantitative criteria of pioneer industry for obtaining tax holiday facility and provide an estimation of the impact of Wavin’s Investment on the Indonesian economy.
4. **“Why Don’t People Save More in Agent Banking? Evidence from Laku Pandai Program in Indonesia”** 2022
Research Assistant—in collaboration with Indonesian Ministry of National Development Planning
The pilot study utilizes randomized control trials to identify whether information and incentives are the main factors in reducing barriers and increasing account opening and savings.
3. **“The Impact of Gas Tariff Adjustments on Power Plants in Batam”** 2022
Research Assistant—commissioned by Batam Industrial Estate Association
This study analyses the economic impact of gas tariff changes and estimates the ideal gas tariff for industrial areas in Batam.
2. **“Promoting Vaccine Take-Up and Tackling Vaccine Hesitancy: The Role of Local Health Workers and Leaders in Indonesia”** 2022
Research Intern—in collaboration with Monash University and JPAL
The project uses randomized control trials to address hesitancy issues related to the COVID-19 vaccine that can help convince villagers to take the vaccine and benefit from it.
1. **“Workplace Health and Safety Protocols during COVID-19 in Indonesia”** 2021
Qualitative Researcher—Commissioned by the GIZ
The project explores the development of COVID-19 health safety protocols and their implementation in the workplace, including the inclusivity of workers with disability.
